

The One Page Term Sheet for Angel Investors

Vancouver Angel Forum
Term Sheet and Valuation Workshop

September 21, 2009

Basil Peters

Three Term Sheet Perspectives

- Bill presented the full National Venture Capital Association term sheet – a full featured, heavy pref share term sheet
- Dan introduced his new, designed for Angels, “Light Pref Share” term sheet
- I am going to describe the “One Page Exchangeable Share” term sheet that is often used by angels in Vancouver
- In your book and on www.AngelBlog.net

Origins of the One Page Term Sheet

- I started to develop the One Page Term Sheet while I was CEO of BC Advantage Funds
- My strategy was to co-invest with Angels
- That required a common term sheet
- David Raffa and Mike Volker helped a lot
- I've used it over a dozen times and it has not gotten me into trouble - yet

Angels are Different from VCs

- Angel investing today is at about the same stage of development as traditional Venture Capital was in the early 1980s.
- In the '80s, I attended VC workshops where they worked on standard term sheets
- We are all still learning how different angels are from traditional VC funds
- We need term sheets optimized for angels

Term Sheets and Corporate Structure

- The term sheet is the most important document between the company and investors
- It establishes the framework for their interaction and the company governance
- Has a significant impact on the success of the entire company

Term Sheets Can Kill

- One of my frustrations is finding a promising company that I would like to invest in
- That has been using a term sheet that is completely inappropriate or detrimental
- And having to spend months of hard work to build consensus among the founders, board, lawyers and other investors to change it
- The wrong term sheet can be deadly

Lots of Interest in Term Sheets

The screenshot shows the Web Log Storming interface. The main window title is "Web Log Storming [Basil Peters] - AngelBlog 2009 Only.wls". The left sidebar contains a tree view with categories like Traffic, Top files and queries, Referrers, and Visitor behavior. The main content area displays a report titled "Visitors accessed page" with a table of file counts.

Foundational Philosophies

- The One Page Term Sheet:
- Assumes good governance and corporate structure
- Is based on alignment and fairness
- KISS (and on one piece of paper)

Capital Structure Alternatives

- Some angels have been using the National Venture Capital Association “heavy preferred” term sheet
- Angels also used convertible debt – which is almost never fair to the investors
- Common shares create the best alignment, governance and KISS
- Exchangeable shares – the “best of all”

The Exchangeable Share

- Well established legal mechanism – but not previously applied in this situation
- Straight common shares, unless
- A subsequent investor negotiates a better form
- Then it can be exchanged, on a one-for-one basis - at the investors option
- Valuation does not change – just terms

The Board of Directors

- Total of five members: the CEO, one nominee of the Fund,
- And three independent of management
- That the Company and the Fund agree on
- Each director must have made a meaningful investment in the Company
- If you believe in the board, common shares are fine - you don't need preferreds

Share and Option Vesting

- All stock options, and all nominally priced previously issued shares, will vest on the following basis:
- 50% of the shares will vest daily and linearly over a three year period; and
- The other 50% will not vest unless and until there is a sale of the Company
- Vesting accelerates on a sale

Liquidity Event – Drag Along

- To ensure that a return can be provided to all of the shareholders
- The Fund will require a "drag-along" right be added to the Company's constating documents
- To allow the holders of 51% of ALL the issued shares of the Company to cause the sale of the Company

Investor Rights

- Investors have the right of first refusal to participate in future financings
- Any changes to the capital structure, new shares, options or debt requires the approval of the majority of the investors in this round

Reporting to Shareholders

- The company will send a CEO Update monthly to all shareholders
- Financial statements will also available upon request

Legal Costs and Confidentiality

- The Company will pay the legal costs of the Fund not to exceed \$6,500, plus taxes and disbursements thereon
- The Company will keep confidential this Term Sheet and all discussions with the Fund for a period of two years

Where The One Page Works Well

- The One Page Term Sheet works well if:
- Total capital required is between \$0.5 million and a few million
- Then the company plans to exit
- There will always be a very good board
- A heavy preferred financing is not planned

When Dan's Light Pref is Better

- My thinking is evolving
- I still like the One Page Term Sheet
- But I am not as confident about companies' ability to recruit and retain a good board
- Many modern companies don't need much money, so its even harder to build a board
- In many situations the Dan Rosen Light Pref term sheet is better
